

# Statistical Analysis to Determine the Effects of Covid-19 on Student Scores

How students in Texas were adversely affected by the consequences of the Covid-19 pandemic, shown in their STAAR exam scores.

Made evident by the above graph, there is **overwhelming evidence** that supports the claim that **the COVID-19 Pandemic negatively affected students**.

- **Every group of students studied** (Males, Females, Hispanics, Asians, Blacks, Whites, economically disadvantaged students, and non economically disadvantaged students) **witnessed decreases in their average scores** after the pandemic.
